

**CR-1. 05SPP-00000-00002                      Key Site 11 English-Joseph                      Santa Maria**

Adam Baughman, Planner (805) 934-6263

Hearing on the request of Coker Elsworth, agent for the owners, English-Joseph Property Investments, for Conceptual Review of Case No. 05SPP-00000-00002 [application filed on December 16, 2005] for a Specific Plan for Orcutt Ket Site 11 to allow 98,806 square feet of mixed use development consisting of 30 apartment units over 56,806 square feet of commercial development. The project would be two stories with surface and underground parking (315 spaces). Approximately 37,000 cubic yards of grading would be required. The application involves AP No. 103-181-006, located at 250 East Clark Avenue, Orcutt area, Fourth Supervisorial District.

**ACTION:**     **Conceptual review only. The Commission made the following comments on the project:**

- Boysen:**
- Recommends incorporation of Chevron site into the project if possible.
  - Very concerned about solving traffic problems on Clark Avenue with yet another signal. There are too many already.
  - Strongly encourages the developer to secure supplemental water for the site now rather than later. This has been a problem for other developers in the past as they have received approvals for development but are unable to construct due to no water.
  - Mixed-use is good if commercial uses below are conducive to the residential uses above.
  - The more self-contained the site can be designed, the better; dual commercial and residential ownership would be good (i.e., commercial shop owners living onsite).
- Brown:**
- Concerned about the scale of the proposed project and the compatibility of the commercial and residential uses.
  - Development of residential units with patios that overlook the Chevron station may not be appropriate.
  - The proposal appears to be greatly overparked. A conjunctive use of parking should be considered and parking reduced.
  - The view from Clark Avenue will be greatly impacted and needs review by the NBAR. This proposal may not fit, especially with the exposed parking structure. Landscaping will be a key element.
- Cooney:**
- Traffic issues are of utmost importance as the pressure on Clark Avenue is already great.
  - The bike path and walking paths need to eventually lead one into Old Town Orcutt instead of requiring people to walk on the shoulders of Clark Avenue.
- Smyser:**
- Reserved his comments until after review by the NBAR.
- Valencia:**
- Show the street lane lines on the site maps.
  - Traffic is a very important issue, having too much parking is better than not enough parking.
  - Recommends continuance to allow review by the North County Board of Architectural Review (NBAR) and by the Orcutt Area Advisory Group (OAAG) and more detail on the recreational portions.

**ACTION:** Continued the item to the Special Hearing of September 19, 2006 in Santa Maria.
