The information in this brochure is intended as a courtesy to the developer to estimate transportation impact fees for new development. Public Works Transportation Staff shall calculate the actual fee, in accordance with ordinance no. 4270 and the most current version of the ITE Trip Generation Handbook, prior to payment.

The Transportation Impact Mitigation Fee is based on the increase in traffic (peak hour trips) resulting from new buildings, building additions or changes in land use. Projects that increase traffic by less than one peak hour trip are exempt from the fee. Increased traffic generated by a project is quantified by using data such as land use, floor area and/or number of dwelling units and then referencing it to technical traffic generation data provided by the Institute of Transportation Engineers Trip Generation Manual and other applicable sources. "Credit" is given for existing traffic generated at a particular site.
